

Cut Costs, Reduce Risks and Boost Productivity

Avocent's LANDesk® solutions help your organization: 1) manage IT complexity; 2) secure all of your deployed systems; 3) design and deploy IT process workflows to automate redundant maintenance tasks, reduce errors, and transition from a reactive work environment to one that's more service oriented; and 4) integrate your service desk and systems management functionality to reduce the number of incidents while boosting the productivity of service desk staff and end users.

These solutions form a unified, tightly integrated platform of systems lifecycle management, endpoint security management, and IT service management technologies that can be expanded as your needs evolve, enabling you to implement new capabilities in the most efficient manner possible. Without question, LANDesk solutions offer low cost of ownership, requiring less server infrastructure and less bandwidth, and have been proven on hundreds of thousands of nodes at organizations worldwide.

In addition to the technologies LANDesk offers, we also strive to meet customer needs through our renowned service and support programs, including design, expert consulting, implementation and integration, project management, and training.

"I'd estimate that LANDesk® remote control has reduced the amount of time it takes for us to resolve network issues by 75 percent, and has reduced the number of times tech support has to visit PCs by 90 percent."

—Peter Maudlin

PC Integration Specialist, Farm Credit Services of America

"We've been using LANDesk® Management Suite for several years and it has become invaluable in how it enables us to support all 13,000 of our PCs and their users."

—John Barnes

Workstation Analyst, Geisinger Health System

"Not only did LANDesk® Management Suite meet our immediate needs, it also allowed us to automate all our IT projects, creating more cost efficiencies and further improving the service we offer to users."

—Samuel Hutin

Technical Coordinator, Heineken France

Proven Solutions

- Antivirus
- Application Virtualization
- Asset Lifecycle Management
- Endpoint Security
- Handheld Device Management
- Host Intrusion Prevention (HIPS)
- Inventory Management
- Process Management
- Server Management
- Service Management
- Software Distribution
- Software License Monitoring
- Systems Lifecycle Management

Timeline

- 1985** LANSystems founded.
- 1991** Intel acquires LANSystems and forms its LANDesk software division.
- 1993** LANDesk Manager 1.0 ships. IDC starts watching desktop management and names LANDesk the category leader.
- 1996** LANDesk starts providing systems-level management to OEMs.
- 1999** LANDesk pioneers virtual IT technology.
- 2001** LANDesk revolutionizes large packet distribution with LANDesk® Targeted Multicast™ technology.
- 2002** LANDesk spins off from Intel.
- 2004** LANDesk integrates the systems and security management markets.
- 2006**
 - LANDesk purchases NewRoad Software for its process management technologies and begins integrating the systems, security and process management markets.
 - LANDesk extends into the consolidated service desk market with LANDesk® Service Desk, powered by Touchpaper.
 - LANDesk acquired by Avocent to operate as an independent division.
- 2007**
 - Avocent's LANDesk and Thinstall announce OEM partnership to provide application virtualization.
 - Avocent's LANDesk introduces host intrusion prevention system (HIPS) technology to address zero-day computer threats.
 - Avocent's LANDesk introduces new Management Gateway Appliance for managing mobile and distributed systems.
- 2008**
 - Leading analyst firm Gartner Research places Avocent's LANDesk in the Leaders Quadrant of its PC Life Cycle Configuration Management Magic Quadrant.
 - Avocent's LANDesk® Management Suite 8.8 named "Clear Choice Test" winner by *Network World* Magazine.
